

List of projects

1. Development of methods for monitoring and removal biologically active substances to improve quality of the environment, Ministry of Education, Science and Technological Development of the Republic of Serbia (2011-today) - Researcher
2. Application of polyaniline/TiO₂ nanocomposite powders on photocatalytic degradation of aqueous suspension of organic pollutants and their toxicity assessment, Provincial Secretariat for Science and Technological Development, Autonomous Province of Vojvodina, Serbia (2014-2015) - Researcher
3. Optimization of the application of mixed nanocrystalline oxide photocatalysts in order to reduce the presence of undesirable pharmaceuticals in wastewater in the Danube basin in the area of Vojvodina, Provincial Secretariat for Science and Technological Development, Autonomous Province of Vojvodina, Serbia (2015-2016) - Researcher
4. Comparison of photocatalytic efficiency of Zr/Fe₃O₄ and Si/ZrO₂ nanopowders in degradation of biologically active substances present in the environment using simulated solar light, Provincial Secretariat for Science and Technological Development, Autonomous Province of Vojvodina, Serbia (2017-2018) - Researcher.
